

*A Welcome  
From  
Maria Wolfe, President*

The Wellington Garden Club is celebrating its 40th Anniversary! Today, the club is 80+ strong and includes diverse, dedicated and talented members serving the Village of Wellington. Perhaps you saw The Town-Crier's May 21 issue that covered the club's anniversary celebration, complete with Mayor Anne Gerwig's participation in commending the club's many accomplishments and contributions to the Wellington community.

Join in on the fun!

I invite you to explore the Wellington Garden Club's website that provides a wealth of gardening information, from ideas on improving your office or home's curb appeal with butterfly gardens, native plants, and/or bodacious flowerbeds to floral designs to growing the perfect heirloom tomatoes . . . and many other gardening facets in-between! On this website, you will learn about the club's many civic projects that serve Wellington, such as the annual scholarships, Garden Tours, Habitat for Humanity landscaping projects, youth garden clubs, etc.

We welcome women and men of all garden areas of interest, ages and skill level.

The club provides classes on the wonderful worlds of:

- floral design,
- landscape design,
- environmental consultation
- And a variety of other gardening secrets.

Please join us at our monthly meetings held the first Monday of every month that feature an educational speaker. Click on the "Club Meetings" tab on this website for the next meeting date. Refreshments are served. Best of all, you will meet others who have a love of all-things-garden! Tour the website that we hope will further pique your interest in joining the club.

As the president of the Wellington Garden Club, I welcome you and look forward to meeting you at our next gathering. You will not regret getting involved in this dynamic and pro-active group of men and women in the Western Communities.

*Maria Wolfe*

President

Plant Diversity is the Key to Insect Diversity
