

Around & About Palm Beach State College September 21, 2023

Our guide was Dr. Vetaley Stashenko, Professor of Microbiology, Anatomy and Physiology. The topic was Native Orchids. In addition to a tour of the grounds around the college where he has propagated native orchids, he showed us an amazing machine in his lab that will dissect from the outside of a body to the very core. At Dr. Stashenko's request a young woman who works at Pine Jog native orchid lab had joined us and spoke about the propagation of native orchids.
