

**WGC Membership Meeting
Wellington Community Center
Monday, October 5, 2026**

Speaker: Carol Ralph

Topic: Protecting Our Florida Nature

Most of you know the history of Carol Ralph with the Wellington Garden Club. She joined WGC in 2017 and has held several positions in the operations of WGC and looks forward to continuing as a member for many years.

Carol is offering a powerpoint presentation prepared by Mona Johnson, UF/IFAS Extension. Mona gave this presentation as part of NGC Environmental Course 4, which Carol took on November 20-21, 2025 and found it very interesting, informative and enjoyable.

It covers the importance of stewardship of Florida Nature; the problems and history of the restoration of the Everglades, Silver Springs, our coral reefs and what we can do on every level to save and faithfully defend from the waste of the natural resources of our state.
